DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 1, the phrase "such as" (line 7) renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shelby (4,796,304) in view of Garry et al. (5,611,084). Shelby discloses a vest comprising: a top see-through, mesh fabric panel (6,16); a bottom colored fabric panel (10,20) (col. 3, lines 8-10) communicating with said top panel at neck opening and outer edges in order to construct tunnel walls or pockets (1, 2, 3, 4, 2b, 4b, 11, 12, 13, 14, 11b, 12b, 13b, 14b) within said garment (col. 2, lines 8-21) wherein a small animal, reptile, insect, etc., is capable of being easily be observed, while providing adequate circulation and confinement while it is being transported and displayed; a means of releasable attachment (col.2 lines 59-61; col. 3, lines 4-7) of said top panel to bottom

Art Unit: 3644

panel to close a gap therebetween; a neck opening (5,15), said neck opening defined by the area in the center of the garment, creating a left front panel and right front panel to the garment; and wherein said means of releasable attachment provides a means of lateral translation of said left front panel in relation to said right front panel, whereby said neck opening may be adjusted for size by adjustment of said means of lateral translation of said left front panel in relation to said right front panel (col. 3, lines 4-7). Shelby discloses that the bottom panel may be made in any color for safety or aesthetic reasons, which is considered obvious to one of ordinary skill in the art to include a panel is a made of bright colors such as orange or red which are commonly used by hunter's for safety purposes as further taught by Garry et al.

Allowable Subject Matter

4. Claim 3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
